## **Girbau UK Displays Energy Efficient Laundry Equipment** *Care Show Preview, 30-31 March, BIC Bournemouth*

**09 February 2010** – Girbau UK, part of Girbau Group the world-leading manufacturer of commercial and industrial laundry equipment, is showing its latest range of energy efficient washers, dryers and ironers on stand W53 at the Care Show, 30-31 March 2010, BIC Bournemouth.

Girbau's most energy efficient washers ever, the latest 6 series is available in seven models with capacities ranging from 9kg upwards. The 9kg model (HS-6008) has already been named the most energy-efficient in its class, according to US body Energy Star. Tests carried out by Energy Star showed the HS-6008 washer uses far less water and electricity than the machines of other manufacturers.

Strong and durable, all washers in the 6 Series range offer spin speeds of up to 1,000rpm and have been designed to provide excellent washing performance with reduced cycle times. Girbau's patented GDRIVE system uses microprocessor control to optimise the high speed spin cycle to suit different types of fabric as well as saving energy and water, reducing noise and vibration and prolonging machine life.

The latest Girbau UK Pro Series II tumble dryers are designed to deliver energy efficiency, high productivity, quick drying and low maintenance with load capacities from 13.5kg up to 70kg.

Girbau UK offers free laundry surveys and specification advice as well as installation and operator training. Customised maintenance and service plans and rental packages are also available.
