

## CASE STUDY

### Claridge's Adds Girbau Ironer to its Five Star Laundry

**24 August 2009** – The world-famous Claridge's five-star hotel in the heart of London's Mayfair, home of Gordon Ramsay's lavish and exclusive restaurant, has installed a new PS 5119 dryer ironer from Girbau UK to provide a perfect finish to its huge daily load of laundry.

"My team has to manage the sorting, washing, drying and ironing of literally thousands of items every day," says Eileen Hamray, Laundry and Linen Room Manager at Claridge's. "Every item has to be finished to a standard befitting a leading luxury hotel and this new Girbau ironer is essential in helping us to achieve that."

Eileen and her team handle the hotel's white and oyster pillowcases, mats, doilies and towels from all of its 203 rooms, as well as the hotel's staff uniforms. That requires up to six people working in the laundry from seven in the morning until midnight every day of the week. Buried deep in the basement of the prestigious art deco building, the laundry has five high capacity washers and five dryers in constant use. A reliable ironer capable of delivering a consistent high quality finish is an absolute must and the latest model from Girbau is one of two now in constant use.

Girbau's PS 5119 flatwork ironer is designed for optimal energy efficiency, ease of use and reliability for years to come. Compact enough to fit in the laundry of the historic Claridge's building, this particular model is still large enough to be used by two people at a time, working swiftly and faultlessly for hours every day.
