

PRESS RELEASE

## **Taking the easy ride to horse rug perfection!**

### **Girbau's washing machines provide the perfect solution to all your horsewear needs**

**02 April 2009** – Every horse enthusiast and stable owner knows the difficulties involved in getting horse rugs and horsewear clean and hygienic for their animal. As well as ensuring they find a machine big enough to cope with the sheer size of the rug, horse owners need to also question whether the rugs actually come out sufficiently clean and sanitised and not to mention the problem of horse hair sticking in the washing machine's filter!

**Girbau UK**, world-leading manufacturer of commercial and industrial laundry equipment has the answer, with its range of medium spin washers. The **MS613 washing machine** has a 14kg capacity, best suited for washing smaller horse rugs or the **MS617** washer which has a huge 19kg capacity - ideal for the larger horse rugs.

Sarah Armstrong proprietor of Equicare an equine solutions business providing livery, coaching, laundry and saddlery repairs based in Keysoe, Bedfordshire uses a Girbau MS617 washer for her successful equine laundry service and says: "I've been really impressed by the Girbau machine and our customers have been delighted with the way it cleans their rugs. Investing in a professional washer that is really up to the job makes such a difference!"

Supplier to the stables of the Royal Household, Girbau UK's MS613 and MS617 machines have a number of features which make them ideal for equine usage: -

- Large capacity means that water reaches all parts of the rug, unlike in domestic machines where the items often come out soiled.
- The machines operate on a dump valve, so any dirt can be siphoned off into the drainage and not pumped back into the machine water (as in domestic washing machines)
- Both machines have a steel door seal (not rubber as in domestic machines) which means that it won't be damaged by any tags and buckles on the horsewear.
- The machines have a large-sized door allowing the user to load and unload bulky horse rugs very easily and with minimum effort.
