Girbau UK to Launch Revolutionary EcoTunnel at Hotelympia

20 January 2010 Girbau UK, part of Girbau Group the world-leading manufacturer of commercial and industrial laundry equipment, is set to launch the revolutionary new EcoTunnel™ System batch washer on stand N2316 on the Spanish pavilion at [Hotelympia](#).

Girbau UK will also be showing its comprehensive 6 Series of highly energy efficient washers, Pro Series II dryers and PS range dryer/ironers for hotel and catering laundries of all sizes. All orders placed for any Girbau 6 Series washers at Hotelympia will benefit from a free warranty upgrade from the standard one year to three years.

Developed specifically for large hotel groups in the UK, the unique new EcoTunnel System is designed for large establishments laundering between 250 and 500kg per hour. Compared to conventional washer extractors, it offers astounding energy savings of 80%, water savings of 75% and 50% savings in labour and detergent costs. Full details of the system will be made public for the first time at Hotelympia.

Girbau's most energy efficient washers ever, the 6 series comes in seven models with capacities ranging from 9kg to 122kg. Girbau 6 Series washers provide excellent washing while using less water, less energy and less detergent. The popular 9kg model (HS-6008) has already been named the most energy-efficient in its class by US body Energy Star.

The latest Girbau UK Pro Series II tumble dryers are designed to deliver energy efficiency, high productivity, quick drying and low maintenance with load capacities from 13.5kg up to 70kg.
