Girbau PSP Ironer Saves the Day at St James's Laundry

22 October 2009 – When St James Laundry, the Peterborough-based laundry serving prestigious hotels and restaurants across East Anglia, suffered a catastrophic failure of its old ironer, it needed to find a modern, reliable and cost effective replacement as quickly as possible. The answer proved to be a new PSP-5132 flatwork dryer ironer from Girbau UK, which the manufacturer was able to supply swiftly enough to ensure none of St James's customers were affected by the downtime.

For a hectic business that can launder up to 15,000 items a day including tablecloths, bath, kitchen and bedroom linen, any unforeseen downtime from malfunctioning laundry equipment could have been disastrous. The new ironer has already proven highly reliable, unlike the ageing model it replaced, and gives St James laundry the high quality finish that its customers demand.

“Girbau's PSP flatwork ironer proved to be a real life-saver for us,” said Mr Jibrán Khan, proprietor of St James Laundry. “We are really pleased with the quality fold and finish it leaves on all of our linen products and its so-far faultless reliability.”

Like all Girbau's flatwork ironers, the PSP range is engineered from high quality materials and is designed to provide years of heavy duty performance. It is easy to operate, thanks to simple controls and features a highly energy-efficient and functional design. Girbau's patented Autospeed® System automatically adjusts the ironing speed to suit the type of material and the humidity, while its Kinematic strap tensioning system ensures a consistent highest level of finish. A filter located at the fan air-intake area, prevents lint exhaust into open areas.
