Girbau UK Improves Warranties to Best in UK

14 August, 2008 – Girbau UK, part of the Girbau Group, world-leading manufacturer of commercial and industrial laundry equipment has extended the warranties on its washer range from one year to two. The company now offers what are believed to be the best warranty packages available in the UK laundry industry with warranties of up to three years on its dryer range too.

Girbau washers are warranted for both parts and labour costs in their first year. Now Girbau washer warranties have been extended to include free replacement parts for a second year, provided that the machine is serviced by Girbau UK or one of its authorised UK agents.

Girbau's dryer range is already covered by up to three year warranties on a similar basis, with the first year covering all parts and labour, while the subsequent two years cover any replacement parts provided the dryer is Girbau-maintained.

Peter Marsh, managing director of Girbau UK, explains the company's move, "We know that customers are looking for reliability, peace of mind and controlled costs, when it comes to the laundry operation. The rugged build quality and proven reliability of Girbau machines means that we can offer this market-beating warranty package to meet that customer demand."

Girbau UK markets an extensive range of washers with capacities from 5 to 120kg and dryers with capacities up to 76kg, as well as a range of ironers, folders and stackers. The new Girbau 6 Series of washers, all of which are now covered by the extended guarantee scheme, are among the most energy efficient machines in their class. The HS-6008 is top-rated for energy efficiency of all the machines tested by US body Energy Star.
