GIRBAU

LAUNDRY EQUIPMENT

Businesses purchasing new models from the Girbau HS 6 Series of high speed washers can benefit from 100% TAX RELIEF under the Government's Enhanced Capital Allowance Scheme.

Thanks to the machines' outstanding water efficiency, they have been granted approval by the Water Technology List (WTL) for the Enhanced Capital Allowance (ECA) scheme.

The scheme was set up by the Government to encourage businesses to invest in new plant and machinery that uses less water. The Enhanced Capital Allowance (ECA) lets businesses write off 100 per cent of the cost of purchasing a new Girbau WTL-approved washer against taxable profits in the year of purchase. Only machines on the approved list qualify and the tax relief is only available for the purchase of new machines.

To be included on the Water Technology List, strict criteria regarding a washing machine's water usage per kg have to be achieved. For washers up to 15kg in capacity, the maximum

water usage per kg permitted is 9.4 litres. Girbau's HS-6008 washer for example uses a maximum of just 7.8kg per litre, making it one of the most water-efficient washers available.

Thanks to the latest highly intelligent controls used on all Girbau HS 6 Series washers, water use is optimised while the highest wash quality is maintained. Using less water also makes the machines more energy efficient and reduces the use of detergents by precisely controlling and dosing chemicals.

As a result, businesses purchasing a new HS 6 Series LOGI or INTELLI controlled washer benefit from lower water consumption, lower energy consumption and reduced chemical use – all helping to save money by permanently cutting utility bills and reducing impact on the environment. These savings accrue on top of the tax benefits of selecting a WTL approved machine.

GIRBAU'S HS 6 SERIES WASHERS are in the category of Efficient Washing Machines on the Water Technology List. Washers ranging in capacity from 9kg up to 122kg are listed and following models are included:

HS-6008	HS-6013	HS-6017	HS-6023	HS-6040	HS-6110
---------	---------	---------	---------	---------	---------
